

Access scientific data for your classroom...for free!

www.urbancarnivores.com

Carnivore data, mountain lion tracking information, photos, and free articles! Most of the work done on urbancarnivores.com reflects carnivore issues specific to the Los Angeles area.

iNaturalist.org

Participate in citizen science projects happening in Los Angeles and all over the world, and export citizen science data contributed by other users.

nhm.org/nature

Our Museum homepage for Los Angeles urban nature. Find citizen science projects for your classroom and check in on the awesome scientific work being done right here at the Museum!

wildlifecrossing.net/california

The California Roadkill Observation System. View roadkill hotspots all over our state to understand and brainstorm solutions to animal/vehicle collisions.

gbif.org

Global Biodiversity Information Facility. Uses data from all over (including research-grade observations from iNaturalist!) to create free and open access to biodiversity data for all users.

eBird.org

Not carnivore-specific, but a great resource for the classroom. Allows you to track bird data across the country and the world, chart migrations, monitor seasonal changes, and contribute your own birding observations.
